Refx Nexus 2.3.2 Team Air TORRENT My Aim with this Blog is to provide a well structured and informative platform for Education, Career & Training, like My Career Tracker. My Career Tracker is a collection of resources that are useful for students, graduates, job seekers & professionals. This blog is about Education, Career & Training and a great place to find the best job openings in India. Students, Job Seekers, Working professionals, Employers can browse through the collection of articles on the blog. You can also read my books on Word Press. They are useful for the future generation and they have articles on many topics on the blog. It happened, once again that I've faced a huge bug in my web application. So, my question is how to handle such thing? I mean I have already developed on my better understanding so I can't face it again, so here I put the question asking how to develop to handle such situation when some issue occur? developing ETL (Extract, Transform, Load) system in java, C# and python. Data is stored in Postgres DB and DB client is written in java. Can anyone suggest a good client to communicate with Postgres DB? I have tried spring jdbc, Oracle JDBC and jTDS, all gives me below error SQLState: 08003, vendor error. Informational message: No suitable driver found for jdbc:postgresql://localhost/studentDB java.sql.SQLException: No suitable driver found for jdbc:postgresql://localhost/studentDB at java.sql.DriverManager.getConnection(DriverManager.java:579) at java.sql.DriverManager.getConnection(DriverManager.java:221) at org.springframework.jdbc.dat f678ea9f9e
